Model:	PRT Range mk2 Gas
Year:	2017+

CAN2L
CAN2H
CAN2 **Do not connect**
CAN1L
CAN1H
CAN1
GROUND
+12÷24V

6 12
5 11
4 10
3 9
2 8
1 7
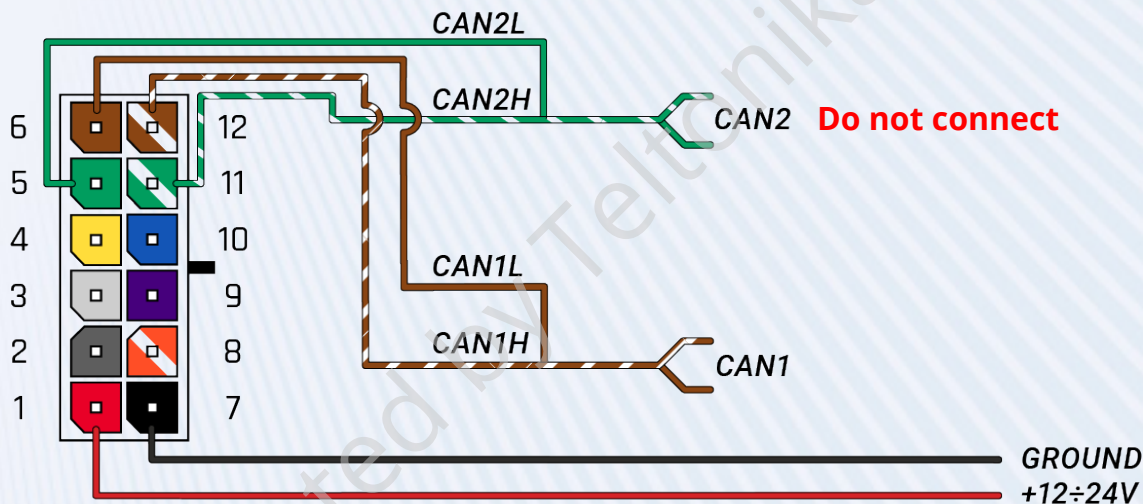

Installation steps:

1. Upload vehicle CAN configuration via FOTA WEB.
2. Connect FMX150 CAN cables to the wires as shown in the installation guide.
3. Connect the power and GND to the wires as shown in the installation guide.

In case of right hand drive vehicle please look for the mentioned connection location on the other side. If it's not available there then check the original location. If neither, please contact Teltonika Telematics Support!

Troubleshooting - in case there are issues with CAN data:

Please contact Teltonika Telematics Support with the following information:

• Vehicle make/model/year
• Chasis code or generation/VIN number
• Responses to oeminfo, lvcangetinfo, lvcancheck SMS/GPRS commands
• Connection pictures
• FMX150 firmware
